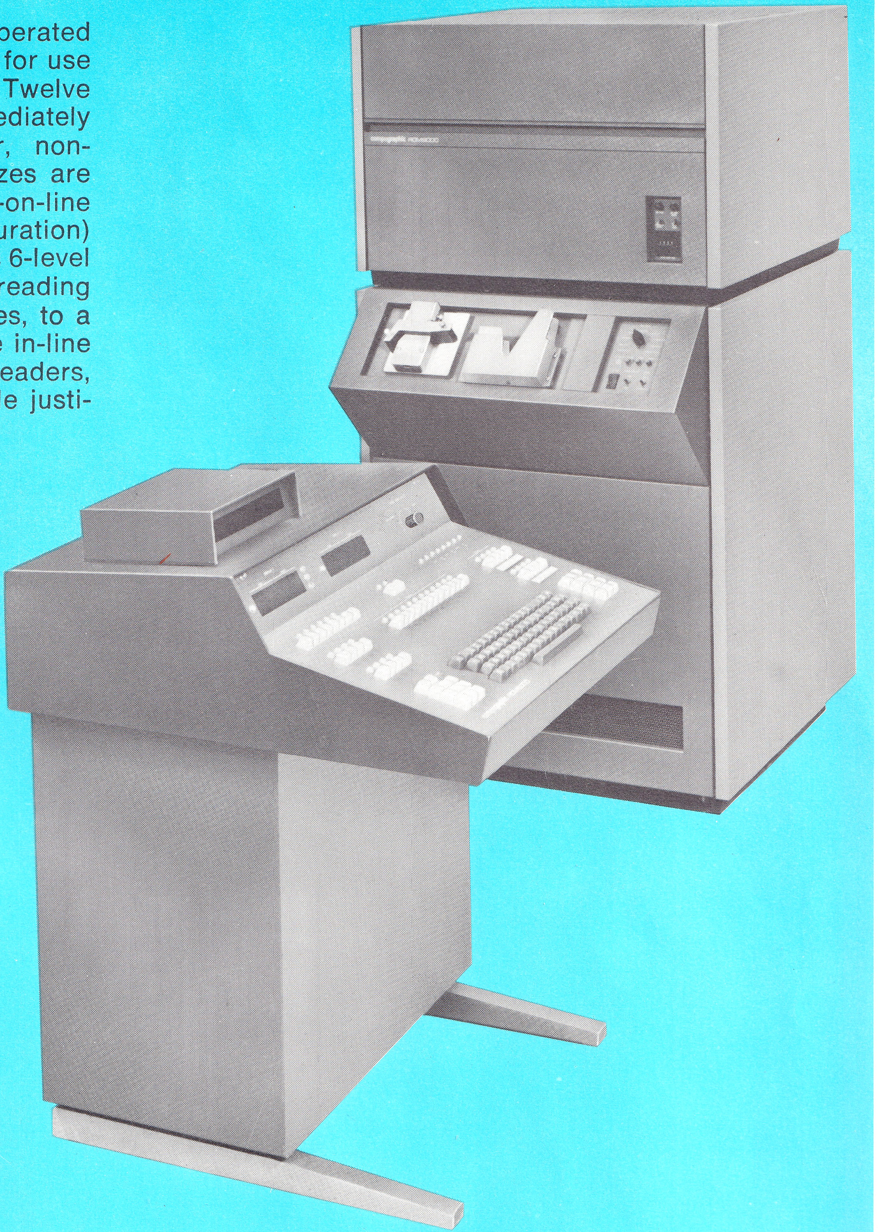
ACM9000

The ACM 9000 is a keyboard or tape-operated phototypesetting system intended primarily for use in setting complex display composition. Twelve type sizes, from 6 to 72 point, are immediately available in any of eight 102-character, non-duplexed typefaces. All characters and sizes are base aligning. Input modes include direct-on-line keyboard to Photo Console (basic configuration) justified or unjustified, or tape perforated as 6-level (justified or unjustified) TTS. Output is right reading photographic paper or film, 3, 6 or 8 inches, to a maximum line length of 45 picas. Complete in-line mixing, automatic quadding, insertion of leaders, white space and rules, tabbing and multiple justification functions are standard.



INPUT: Direct Keyboard, justified or unjustified, to photo console (basic configuration) or tape perforated as 6-level (justified or unjustified) TTS.

TYPEFACE CAPACITY: Two film strips with four 102-character fonts each. 816 characters total in machine at one time. Non-duplexed.

POINT SIZE RANGE: 6 to 72 point.

TYPE SIZES: Twelve sizes. Standard lens arrangement is 6, 8, 10, 12, 14, 18, 24, 30, 36, 48, 60, and 72 point. Other sizes available.

MIXING: All sizes and all faces (96 fonts) may be mixed in any line. Common baseline and left hand alignment.

SPEED: 25-8 point, 11 pica lines per minute.

LINE LENGTH: Any length through 45 picas inclusive.

LEADING: From 0 to 99 points in one-half point increments.

QUADDING: Left, right and center.

HYPHENATION: Automatic and discretionary.

JUSTIFICATION: Automatic and manual.

INSERT SPACE: Automatic.

INSERT RULE: Automatic.

INSERT LEADERS: Automatic.

TABBING: Four positions plus auto-tabbing.

WIDTH COUNTING INCREMENT: 1/54th EM.

OUTPUT: Right-reading positive photographic film or paper.
